I like to rotary cut, and machine piece and quilt my projects. I want things done quickly! I also prefer traditional quilts to the more modern style. If your quilting style is similar to mine - or if you're just getting started in the quilting world and looking for a style - you'll enjoy this book. Nancy J. Martin is my favorite writer on quilting. The quilts are beautiful, the instructions are clear and concise, AND there are color pictures of each quilt (that's my favorite part). The quilts are rated according to difficulty (but none are really THAT hard to make). The beginning of the book has a nice "basics" section and the book ends with a short section on finishing methods. I've got so many new ideas for quilts now - i'm off to the fabric store! Great book!0 of 0 people found the following review helpful. Five StarsBy Barbara Jean Younggreat book0 of 0 people found the following

Though quite a few years old it is a great reference book to have so I now have many patterns in one volume. I chose a used copy which was just like new and was a great bargain.
