**Ray Hemachandra, Jim Romberg : 500 Raku: Bold Explorations of a Dynamic Ceramics Technique (500 Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised 500 Raku: Bold Explorations of a Dynamic Ceramics Technique (500 Series):

7 of 7 people found the following review helpful. if you raku, this is a necessary book. By raku mi this book opens your eyes to how far you can push the art of raku. i highly recommend this book to anyone who is an experienced raku artist as well as the beginner. i was blown away at what people have done with the art. for the money, this is a great book. there is however, no glazes documented. i would suggest buying a raku recipe book (fired up with raku) if you want to try and figure out what glazes they used. if you are having questions on a glazes or technique feel free to email me. mikeycimino@gmail.com .....cheers! 0 of 0 people found the following review helpful. another great book from Lark Publishing By T. A. Glisson I am a potter and sculptor. I have about 12 of the 500 series books. The 500 Raku I especially like.... and it's not just because I happen to have a piece in this addition ( mask on page 226 ) but because I have been raking for about 8 years now, and I am very inspired by the beautiful photos. Speaking of photos.... the Lark publishing Company has very high standards for submitting photos for consideration for submission to their books. This is why they have such beautiful photos of their art work in their books. If you love pottery , if you love raku, you will love this book. 1 of 1 people found the following review helpful. 500 raku By dirry bloemgeweldig boek great book erg mooi raku very beautiful rakuals ook de andere boeken in de 500 serie also the whole collection of the

Raku is an ancient ceramics technique enjoying a modern-day renaissance. This groundbreaking new entry in the highly successful 500 series demonstrates the vitality and invention of today's raku ceramics. Objects including cups, plates, bowls, vases, and statuary contribute to this international gallery of work juried by Jim Romberg, one of the leading practitioners and teachers of raku in the world.

"500 Raku is a delight. I can imagine how hard it was to select the 500 pieces out of more the 1,200 submissions. The more I explore the book, the more I get an appreciation for the vast imaginative, creative and technical diversity that this technique has evolved into from the traditional tea sets. The book has everything traditional and contemporary designed teapots and teacups, sculptures varied from classical to whimsical styles, conceptual pieces, wall decorations, abstract work and highly detailed ones. I actually put the book in a place I can browse it daily, because every time I open it, I find new treasures. I wholeheartedly recommend this book for all art lovers, ceramic lovers, and ceramic artists who would like to get inspired." - Moshe Mikanovsky
