**Bruno Pautigny : 60 Years of Combat Aircraft: From World War One to Vietnam War** before purchasing it in order to gauge whether or not it would be worth my time, and all praised 60 Years of Combat Aircraft: From World War One to Vietnam War:

2 of 4 people found the following review helpful. mainly a colorful profile book. By Rad63 The book is mainly a number of well done, predominantly side view, profiles of warplanes used by air forces of the world from WWI through Vietnam. Model builders might find this of some value. I enjoyed reading it and will keep it in my aviation history book collection.

From the Battle of the Marne to the end of the Vietnam War, this first half of the 20th Century must undeniably be considered as quite representative of aerial warfare. With the 400 profiles and illustrations contained in this book, Bruno Pautigny, the world famous illustrator, paints the technical portraits of the most famous fighters and bombers of all the great conflicts of the previous century: First and Second World Wars, Indochina, Korea and Suez, Algeria, Vietnam, etc.

attractive and colorful book recommended (World War I Aviation)
