M A Halim : Adaptive Array Measurements in Communications (Artech House Antennas and Propagation Library) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Adaptive

Array Measurements in Communications (Artech House Antennas and Propagation Library):

One of the most damaging factors associated with any radio communication system is the effect of undesirable or interference signals. This book gives you the knowledge you need to ensure your adaptive array system is protecting your communication links to the fullest. It presents concepts and procedures that help you realize the maximum processing capabilities of a given system, choose the right system for a specific application, and identify precautionary steps to avoid adverse effects.

About the Author M.A. Halim is senior RF engineer at SR Telecom in Kanata, Ontario. He holds a M.Sc. Tech in electrical engineering from the University of Sheffield, England and a Ph.D. in electrical engineering from the Technological University of Delft, Holland.
