0 of 0 people found the following review helpful. Five StarsBy CJAwsome2 of 2 people found the following review helpful. Animal Lovers Coloring BookBy Angela H.Lots of variety in the pictures. Some have very small lines. At first I thought the pictures repeated but they don't, some are different just very similar. There are pictures for all age groups to color based on the size of the lines they are made with. Most pictures are of single animals centered in the middle of the page and lots of white space around them. There are a few square pictures with very small lines centered with a lot of white space as well. There is only one picture per page and the pages are not perforated. The paper quality is decent but if you prefer using gel pens or any pens I recommend putting something in between your pages.1 of 1 people found the following review helpful. Intriguing pictures. Very detailed.By Amy SheetsI love the designs. The

paper is really good. The covers are something that i would pick up inside of a store if i passed it. I think that the designs in each animal is one to unique and actually represents the animal as a whole. The turtle for example it says that its simple but yet its fascinating. While looking thru the coloring book each animal stood out. Some more complex to color but others pretty neat! One of my other favorite animals in this book is the dolphin and owl. The tiger is rather striking!Loved this book!!

Fall into the soothing world of adult coloring with these awesome, stress relieving wildlife images! Thirty-one beautiful drawings, waiting for you and your creativity to bring them to LIFE. Praise for Frog Prints Coloring Books So soothing and enjoyable. Makes me wonder why I ever thought I was too old to color! Beautiful images. I find myself cutting them out and hanging them on the fridge like I did when I was a kid. My favorite adult coloring book. Dozens of amazing pictures to color, and the quality is top-notch. Perfect balance of challenging and fun, but not so detailed that they require surgical precision to make them look good... Cover colored by Zedz Mudlong
