**Harold Newman : An Illustrated Dictionary of Jewelry** before purchasing it in order to gauge whether or not it would be worth my time, and all praised An Illustrated Dictionary of Jewelry:

"Of the few dictionaries of jewelry that have been published this is certainly the best." Retail Jeweller From the AA Pendant (a jewel in the Green Vault at Dresden) to Zuni jewelry (from New Mexico), this popular reference work provides collectors, students and dealers in jewelry with an authoritative fully-illustrated guide to the subject. Harold Newman, who was a famous collector and writer on the decorative arts, incorporates definitions of terms relating to

the processes used in jewelry making, descriptions of the principal gemstones and their characteristics, brief histories of famous named jewels and gemstones, and biographical entries on designers and makers of jewelry from the Renaissance to modern times. With its extensive cross-referencing and selected bibliographical references for further reading, this volume has no rival. 685 illustrations, 16 in color
