**Joost Langeveld : Animal Origami (Mass Market Origami Books)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Animal Origami (Mass Market Origami Books):

(SAYS THE ADV. AND THE COVER) actually came with no papers at all. 1 of 1 people found the following review helpful. My kids loved this! By tnsdean I got this for an 11-year old and he loved it. We got him extra paper and he uses the book to repeat some of the designs, though it's much harder without the original paper. 0 of 0 people found the following review helpful. Enjoyable and accessible, with beautiful paper. By K. Lotfi I have to chime in because it saddens me to hear so many critical reviews of a book that I have found to be enjoyable and accessible. I am an origami novice, having made perhaps 2 models previously in my life. I was able to follow the instructions for the turtle with very

satisfying results. Contrary to some other reviewers, I found the photographs of the folding steps to be helpful because I was able to use the pattern of the paper to make sure I had the correct orientation of the model by matching it to the photo. By contrast, I have found origami books that use abstract drawings for the instructions to be more difficult to follow; even the subtle shadows between folds in a photograph can help ensure that one is folding correctly. While some steps were a bit of a head scratcher, requiring a little bit of trial and error, I have always thought of origami as an activity that necessarily comes with some challenge. The patterned and textured paper is beautiful and lends a more satisfying look to the finished models. TLDR: This book has good instructions and beautiful paper; a little patience and trial and thought may be required to figure out some steps, but that is in the nature of origami, and not the fault of this book.

About the Author Joost Langeveld lives in Holland. Creativity has always been an important part of his life. Until he was about 14, Joost obsessed over Technic Legos, making remote cars, cockpit interiors, a joystick, and even a food mixer to make pancakes. By the time he was 16, he had switched his creative energies to computers and began programming simple computer games and vector-animations to impress his friends and family. Joost's career is still in the computer field, but since he turned 26, origami has become his favorite hobby. Joost is fascinated by both the technical and creative aspects. He has found that it is one thing to fold a model so it has four legs, a tail and a head-- but quite another to make it look like a real animal. Joost is especially known for his amazing and realistic flowers and arrangements.
