Timothy Tripp : Aquaponics Plants: Best Plants For Aquaponic Gardening before purchasing it in order to gage whether or not it would be worth my time, and all praised Aquaponics Plants: Best Plants For Aquaponic Gardening:

0 of 0 people found the following review helpful. OK, but was hoping for additional info that wasn't in itBy B. SeeI purchased this book because I'm starting my first aquaponics growing bed, and wanted to see what options I would have other than the growing seeds provided with the setup I purchased. Although this book provided a list of plants that have been successfully grown using aquaponics, I was hoping for more information on plant requirements and

care along with the lists0 of 0 people found the following review helpful. Little bit of a light book. Basically a list ...By CustomerLittle bit of a light book. Basically a list of plants. Nothing you couldn't get via a Google search0 of 0 people found the following review helpful. Very helpfulBy kjmom23This is a very helpful little book that contains exactly the information I was looking for. I do recommend it.

The word "Aquaponics" comes from two other words: Aquaculture and Hydroponics. Aquaponic systems have three important elements fish, plants and microbes. Fish are the main element in aquaponic systems; they provide the nutrients for the plants. There is no soil in aquaponic, pebbles or gravel can be used. Plants can grow in water rich in nutrients in the tanks. But how do we know which plants are best in aquaponic systems? Well there are many factors that contribute to develop one plant or another like fish tank density, fish waste or nutrient content in the water. So let's learn a little bit more about which plants suits best in aquaponic systems.

About the AuthorTimothy Tripp is a published author who specializes on gardening and farming topics. Gardening is the passion of his life and he enjoys all aspects of it. For Timothy gardening is a an endless source of inspiration as well as the way of relaxing. He thinks that garden is like a painting and it is up to you how well you paint it. Besides gardening Timothy also has a big interest in farming related topics. Timothy wrote books on various gardening subjects including container gardening, vertical gardening, herb gardening, raised bed gardening, aquaponics and other. In his books he focuses on giving quality and actionable information to the actual readers. Timothy thinks that being a gardener is much more than just planting and maintaining plants it is also a way of living and expressing your attitude to the world. He thinks that gardening is one of the most delightful experiences that exist.
