Marie-Jeanne Lorente : Art of Papermaking with Plants before purchasing it in order to gage whether or not it would be worth my time, and all praised Art of Papermaking with Plants:

2 of 2 people found the following review helpful. Not quite paper making, but a beautiful book no lessBy L. M. JacobsWhile the items in this book are beautifully crafted, they are not what I would consider "paper." The end product is extremely thick and fibrous, and most lack the versatility to be used for projects such as bookarts. Because I was hoping for fresh ideas and inspiration in paper making with local materials, I am returning this book.1 of 1 people found the following review helpful. Great resourceBy Judy KlichGreat book! Lots of information on making paper with plants and other natural materials. haven't seen another book like it.24 of 25 people found the following review helpful. Nice photos but not paperBy Maid of PaperThis is a wonderful looking book but the title is misleading. These are not true papers but pressed plants. I would love to see the actual pieces to check for stability. Lovely to look at in the book, but do they hang together? Don't even think of putting these through your printer or even writing on them.

Perhaps they are meant for framing. maid of paper

Explore the joy of transforming plants, trees and grasses into exquisite paper using this friendly and inspiring book, which offers clear, step-by-step instructions for turning an array of common and exotic plants into artistic and practical sheets of paper.

About the Author Marie-Jeanne Lorent is an artist and educator who lives in the Languedoc-Roussillon region of France.
