before purchasing it in order to gauge whether or not it would be worth my time, and all praised Artistic and Scientific, Taxidermy and Modelling: A Manual of Instruction in the Methods of Preserving and Reproducing the Correct Form of All Natural ... on the Modelling of Foliage (Classic Reprint):

Excerpt from Artistic and Scientific, Taxidermy and Modelling: A Manual of Instruction in the Methods of Preserving and Reproducing the Correct Form of All Natural Objects Including a Chapter on the Modelling of Foliage Some years have elapsed since the publication of a work from my pen entitled Practical Taxidermy, which, despite its elementary character, has - judging from numberless letters received from all quarters of the globe - been of some service to its readers. Since that time, the gratifying strides made by taxidermists towards a better understanding of their art, and by museum authorities towards a more scientific exposition of natural objects, have emboldened me to describe methods of taxidermy and modelling not yet published, most of which are, indeed, absolutely novel, and at present confined to the Leicester Museum. Although many of the processes described are somewhat advanced and necessarily technical, yet, as the old methods of work have been re-described, corrected, and have had new light thrown upon them, the learner is easily led from the known to the unknown, the stages being so defined that he need not be alarmed at the magnitude of the task set him.
