Deborah Morbin, Tracy Boomer : Baby and Toddler Scrapbooking before purchasing it in order to gauge whether or not it would be worth my time, and all praised Baby and Toddler Scrapbooking:

A book that will appeal to anyone who wants to record those special childhood moments. Filled with useful tips and alternative suggestions, this book contains over 120 beautifully photographed sample pages - with informative text on how they were put together. The authors' decoupage background (they have written three books on the subject) serves them well, as they include handy tips on painting, cutting and 'scrapoupage' - a technique they developed adapting decoupage for scrapbooking. As they've included a variety of styles, there's something for everyone, from beginners to

advanced scrappers.
