**From Beytes, Chris (EDT) : Ball RedBook: Greenhouses and Equipment** before purchasing it in order to gage whether or not it would be worth my time, and all praised Ball RedBook: Greenhouses and Equipment:

4 of 4 people found the following review helpful. Vol 1 Ball Redbook By Hortstudent For a beginning student in horticulture this book is great for anyone interested in greenhouses and how they work. This gives loads of information on logistics of placement of the greenhouse, glazing material, form, heating/cooling and information that is really invaluable to the greenhouse manager. It is concise and well written, easily understood and informative. I have really only scratched the surface of what is in this book. I value this as an important part of my library of horticulture literature. Buy here at .com and save at least 40percent off college bookstore prices. 0 of 0 people found

the following review helpful. Very useful for thinking through design quandaries of planning a new ...By Paul BrayVery useful for thinking through design quandaries of planning a new greenhouse range. As expected, the lighting chapter is not cutting edge current, but the rest, as is the lighting, a good overview of options, best practices and laying out automation possibilities. Useful for a quonset to multi acre range designs.0 of 0 people found the following review helpful. Four StarsBy MCclear and informative. Reliable publishers

This professional horticulture reference, which has been in print continuously since 1932, is fully revised and updated in this new edition. Based on real-life experiences from industry professionals including growers and equipment and greenhouse manufacturers, the presented information covers all aspects of greenhouse equipmentthe structures themselves, benches, irrigation, curtains, environmental controls, machination, and the greenhouse as a retail facility. The most recent developments in greenhouse evolution are discussed, as are the varieties of available greenhouse structures, from freestanding and gutter-connected greenhouses to shade houses and open-roof greenhouses. Information on the business side of managing a greenhouse is provided, including how to market products and how to operate a retail store from a greenhouse.
