Being a brick stitch addict made the wait even harder. I can't begin to tell you how disappointed I was when I received it. While the individual projects are beautiful, the instructions left much to be desired for this beginning beader. Instead of having clear instructions and photos with

each project, the author bunches basic instructions up at the beginning of the book. What is given is very clear, but there is a LOT left out. I am given the impression the author assumes you know how to do everything else. The black and white photos of the projects are named but not numbered, and they aren't in any particular order I could figure out. The center of the book has numbered, colored pictures of each finished project, but not the pages where they can be found. A small thing, but it would have been useful. Each project page itself has very little, if any, instruction beyond a pattern chart, materials, and bead chart. The accompanying photo is black and white, which isn't any help with bead color. I hate to be so negative about the hard work the author obviously put into the projects in this book. I would rather she included more instruction and eliminated the black and white photos. The bags and few jewelry pieces are enticing, I'm just not to the point where I know all I should to make them. This is one book I'll put aside until I learn more about making fringes and other small details which I couldn't pick up from here. 0 of 0 people found the following review helpful. awesome book By Pamela Hurst I love this book I have never quite got brick stitch . Let the Master of Brick Stitch teach you an entirely new and easy way to make these very popular small beaded purses that are worn as necklaces. And as a bonus, learn an exciting new beading stitch called Freeform, which can be used to make all sorts of jewelry. New ways to use brick stitch, new designs, new techniques, and the same best-selling Deon quality that crafters have loved for more than ten years. Deon's new book is fully illustrated, with her characteristic easy-to-follow instructions and lots of photographs of the designs - both color and black white. The patterns are clearly graphed by computer, making them easy to read and follow. Included are many ideas for trimming the edges of a purse, as well as a variety of necklace strap suggestions. Deon's Tubular Brick Stitch techniques are unique, allowing the beader to start every row at the edge of the chart. The starting point does not spiral around the beadwork as with many other purse techniques, making this method easier to use. The Tubular Brick Stitch instructions include sections on design charting, tubular foundation rows, and beading the body of a purse. Various trimmings for the top and bottom of a purse, plus beautiful necklace straps are explained and illustrated. Any of these trimmings can be added to any of the purses, as the photographs suggest. Instructions for the Freeform Stitch are given and example bracelets, necklaces and purse straps are described and pictured. This stitch is a special way to "cage" a stone, glass or driftwood piece, or any bauble as a pendant in a necklace, brooch, bracelet, bolo tie, earring or barrette. 14 exciting and easy to follow Treasure Purse patterns are included: Hearts Flowers; "Z" Purse; Frills; Fleur-de-Lis; Windmill; Hairy Elephante'; Ribbons; Wabunung; Stripes on the Diagonal; Deer To My Heart; Diamond Connection; Four-Twenty-One; Zig-Zags; and Kokopelli. Don't miss this opportunity to own a book that you are sure to use again and again. A great gift idea for newcomers and knowledgeable beaders alike! 63 illustrations; 15 photographs; 10 pages in full color.
