Rebecca Desnos : Botanical Colour at your Fingertips before purchasing it in order to gage whether or not it would be worth my time, and all praised Botanical Colour at your Fingertips:

0 of 0 people found the following review helpful. Wonderful thorough book! By Michelle M House Loved the alternative approach in the book and am so glad I got it! I originally bought the ebook but also purchased the paperback as soon as it was available. As a new natural dyer, I had been looking for something that would break down some of the basic processes in a simple way and I think this definitely did it. This method has worked so well for me

already! Thank you for creating something so lovely!6 of 6 people found the following review helpful. An excellent addition to your natural dye library!By AliceI first bought this as an ebook and then added a paper copy to my library when it became available. This is a great resource for truly natural dyeing. The author uses soy milk as a mordant instead of metal salts, so this is potentially one of the safer methods available. I have had great success with her avocado dyeing instructions and am really proud of the beautiful colors I was able to produce on wool yarn. These instructions are not for someone looking for a super quick project however, because some of the processes can take days. But in my opinion, you can't rush art and the time spent is well worth the results.4 of 4 people found the following review helpful. Wondering about soy mordanting ?By PattyI am very happy to add this book to my library of textile art dye books. The process of soy mordanting is of particular interest to me. This book could not do a better job of explaining the process. thank you

Do you love plants? Do you love crafting? Would you like to dye your own fabric, yarn or clothing? Learn the relaxing art of botanical dyeing with natural dyes, Rebecca Desnos. Connect with nature and open your eyes to the colour potential of plants. Discover how to: produce a wide palette of colours, including pink from avocados, yellow from pomegranates and coral from eucalyptus leaves. extract dye from just about any plant from the kitchen, garden or wild. use the ancient method of soya milk mordanting to achieve rich and long-lasting colour on plant fibres, such as cotton and linen. produce reliable colours that withstand washing and exposure to light. If you enjoy sewing, knitting or any other fibre craft, this is the book for you.

About the AuthorRebecca Desnos is a natural dyer who lives in England. Her passion lies in sharing her surprisingly simple methods with others. Well known on Instagram for dyeing with avocado skins, Rebecca shares her daily experiments with thousands of crafters all over the world. Due to much demand, she embarked on a journey to bring her popular eBook *Botanical Colour at your Fingertips* to paperback. Rebecca has a varied background in linguistics and interior design, and has been a crafter since her early childhood. Now, as a mother, she finds that plant dyeing is the perfect antidote to busy life. She fills her bag with plants wherever she goes, always in search of new colours. She can usually be found tending to her dye pot in the kitchen.
