Anne Akers Johnson : Brilliant Bead Rings (Klutz) before purchasing it in order to gage whether or not it would be worth my time, and all praised Brilliant Bead Rings (Klutz):

kept begging me for beading supplies to make me jewelry - not wanting to invest in a whole bunch of stuff that would end up on pipe cleaners and sewing thread bracelets, all over my house (and in the trash), and maybe eventually in the wasteland of a passing interest, I got him the Klutz book so he could learn to make real wearable jewelry, and have all the materials he needed in one place, without a lot of potential waste. I figured if he developed a lasting interest, we could go on from there. He spent hours pouring over the book and very quickly was able to make every ring with no supervision from me! There are several projects, each with an increasing level of difficulty, but with simple enough directions and good photographs so that he could work independently and end up with a very satisfying and pretty product. There were some moments of frustration and trial and error, but that was the point - this was a good exercise in patience and perseverance, great practice for fine motor skills, and a vehicle for developing design and color sense. There are more than enough beads and wire for several variations of each ring and no need for any extra tools. Thanks to Klutz, all the important women in my son's life have lovely little woven beaded rings. It would have been nice if there'd been some boys pictured in the book making the jewelry too, but he wasn't put off, and he even made himself a ring that because of his color choice looks like an exploding firework rather than a dainty flower. And as I suspected, this was a passing fancy, but one that he could develop further if he ever wanted to pursue it - and now he knows what supplies he will need and has the book for direction and a reference. 0 of 0 people found the following review helpful. They should not sell like this. By Kyungsuk Hughes I had to break the case because center was glued. only 1/3 of beads and wire was there. I used it for my kids. They should not sell like this. 0 of 0 people found the following review helpful. Great gift By snsandsnsibility When I was younger, I was given this as a gift and loved it.
