**Robert Hendry : British Railway Coaching Stock in Colour: For The Modeller And Historian** before purchasing it in order to gage whether or not it would be worth my time, and all praised British Railway Coaching Stock in Colour: For The Modeller And Historian:

The first colour book to explore the development of coaching stock with vehicles from over 30 different railway companies, including London Transport and Great Northern Railway of Ireland. From a personal archive of colour images, the author has selected an outstanding compilation, tracing coaches from early examples to BR Mark 1s.

Diesel railcars and electric stock are included, all with lengthy and informative captions.
