A must have for outdoor peopleBy F. BuwaldaI have had this book in my library for many years. I have now purchased an extra copy for my son. Even though it already is about a century old, much of the information contained in it is still extremely valuable today for campers and hikers. My friends call it 'the log cabin bible'.

Finally published in 1917 and coming in at over 400 pages long, Horace Kephart's *Camping and Woodcraft Volume I - Camping* is almost universally acknowledged as THE definitive period text on the subject of camping in the old style. Written as it was during the Golden Age of American camping, this volume is packed with details on tents, sleeping, cooking and camp equipment of all kinds as well as an extensive section on camp cookery. Aside from the nuts and bolts information on what to take, the volume is packed with forgotten wisdom on topics as diverse as camp health and hygiene, keeping and staying dry using cotton and canvas and much, much more. Although Kephart had previously published *The Book of Camping and Woodcraft* in 1906, a decade later, in 1916, he released a much revised and expanded edition. This edition was so extensive they had to split it into two separate volumes for easy reading. This volume is an exact replica of the original. Page layout, numbering, table of contents, illustrations and index are identical to the definitive 1917 edition. If you're seeking to move away from the commercialism, tech-focus and planned obsolescence which is such a part of today's dog-eat-dog outdoor industry, do yourself a favour and take back the Great Outdoors on your own terms by following Kephart's timeless advice from a century ago. The interior of this new edition from Ropesend Creek Press is a perfect replica of the original. Page numbering, illustrations, layout, table of contents, index and any footnotes are exactly as they appeared when the original book was published. With this new edition, the book is ready for a new lease of life through a modern readership.
