locally. The author has a solid and thorough grasp of the subject, and he packs a lot of information into each chapter's average of 3 paragraphs. Each strain is presented in its own 2-page spread with a full-page photo of the live plant and a solid introduction to the strain, its history and growth habits - as well as the occasional gardening tip. Each strain's parental lineage, potency and breeder are given as well. Some strains have a wealth of info provided, well some act more as a general introduction. Don't expect a long-winded smoke-review. Since I feel that the effect of cannabis is largely subjective - this is okay with me, but if you are looking for something to guide you through the nuances of each strain's subtle differences in effect - you might be better served by some hands-on research. Those looking for information about each strain's medical uses should look elsewhere as this book does not cover this at all. 1 of 1 people found the following review helpful. I love these books. By Ocanabis I have all 4 of books in this series and have enjoyed reading them very much. Every time I get one of them I end up making a list of a few strains that I would like to try. The reading is entertaining with just enough info to cover the basics of each strain. Let's face it, with 100 strains to choose from there is going to be something for every one's taste. There are a lot of great photos to wet that appetite as well some will have you drooling a little more than others but I guess not every Is camera savvy as me lol. My books are always on the coffee table these days and make for some good ole shop talk when company is over. If you don't have a copy on your table then you and your pals are missing out (your loss) lol. Ocanabis 0 of 0 people found the following review helpful. Five Stars. By ALLan Husketh Great

Cannabis plants are classified into two main groups: Indica and Sativa. This book focuses on Cannabis Sativa, an especially tall and potent species of marijuana that true connoisseurs love not only for its smoke that induces a desire to create art and socialize with people, but also for the interesting challenges it presents to growers due to its size. This is the latest book in the bestselling series focusing on Cannabis Sativa, the most celebrated and mythologized marijuana type in the United States. No other strain guide series has looked at Cannabis Sativa in such depth before, and the fan base established by the previous best-selling books, Cannabis Indica, Vols. 1 2 and Cannabis Sativa, Vol. 1 is eagerly awaiting the release of this new title in order to collect the whole set. Featuring 100 strains of amazing Sativa-dominant genetics and 100 different breeders, this book is a must-have for pot enthusiasts, pot growers, and pot connoisseurs, new and old alike. Cannabis Sativa, Volume 2 features genetics from 100 different seed breeders more than all other cannabis strain guides put together. This book features genetics from such varied countries as Britain, Holland, Canada, Russia, Spain, Switzerland, France, Afghanistan, Pakistan, India, Denmark, Slovenia, Australia and the USA. No other strain guide series features this many emerging seed breeders, as well as established cannabis seed companies. Cannabis Sativa is the latest book in this must-have series for connoisseurs and growers looking to expand their knowledge about the plant, and the genetics in their gardens. Featuring classic Sativa strains, such as Kali Mist, Diesel, Jack Herer and Chocopee, Cannabis Sativa, Volume 2 also introduces fascinating brand new, never-before-seen varieties from previously unknown seed breeders. The book also features multiple strain variations on Haze the strain of choice for connoisseur breeders and smokers, and a favorite amongst medicinal and recreational users throughout the USA. Filled with hundreds of beautiful full-color images, this book is ideal for every grow room, dorm room, and living room. Each plant is discussed in detail, with accurate information on genetics and lineage so that readers can become experts on Cannabis Sativa strains their aromas, flavors, potency, THC content, medical potentials and growth patterns. Cannabis Sativa, Volume 2 is a true resource for the Cannabis community, providing useful information to enthusiasts and invaluable insights to the seed-buying public. Unlike its competitor, The Big Book of Buds, which only features 30 companies that pay to be included and over 20 pages of advertisements, this book is a true reflection of the global marijuana seed breeding movement. Strains were selected based on their relevance to the current market and the strength of their genetics. There are no advertisements in the book and no one paid to be included. Chief editor, bestselling author S.T. Oner, carefully selected all strains based on merit, not advertising dollars. This grassroots philosophy resulted in the previous books in this series selling thousands of copies to devoted fans during their first year in print. With an introduction by Mel Thomas, the bestselling author of Cannabis Cultivation, A Complete Grower's Guide, now in its 3rd Edition and with total sales of over 30,000, discussing his views of the Cannabis Sativa plant, as well as its history, growth patterns, genetic tendencies, breeding potentials and smokeability, this book is every true cannabis enthusiast's dream.

About the Author S.T. Oner is the best-selling author of Marijuana Outdoor Grower's Guide and Marijuana Chef Cookbook, both bestsellers in the genre and published by Green Candy Press. He is also the editor of Cannabis Indica: The Essential Guide to the World's Finest Marijuana Strains, Volume 1, Cannabis Indica: The Essential Guide to the World's Finest Marijuana Strains, Volume 2, and Cannabis Sativa: The Essential Guide to the World's Finest Marijuana Strains, Volume 1, all of which have gone on to become classics in the marijuana strain guide genre. Mel Thomas is the best-selling author of Cannabis Cultivation: A Complete Grower's Guide, now in its third edition and published by Green Candy Press. Code-named MR. BIG by detectives the author was eventually arrested after a covert operation involving over 30 officers from four separate police forces and charged with conspiring to produce \$4 million dollars of marijuana. When sentencing the author the trial judge called him "A horticultural expert involved in

a resolute and successful attempt to grow marijuana on a commercial scale." He wasn't wrong.
