From CT Publishing : Carol Doak's Foundation Paper before purchasing it in order to gage whether or not it would be worth my time, and all praised Carol Doak's Foundation Paper:

4 of 4 people found the following review helpful. I wouldn't paper piece without it!By JLCThis is my second order for this foundation paper. I love it. It goes through my inkjet printer easily. Then it tears off of my paper-pieced blocks easily, when I am ready for it to. What else can I say? I tried plain printer paper before, this is so much better! I also took Ms. Doak's Craftsy class for paper piecing. With her techniques and her paper, my work turns out perfectly!6 of 6 people found the following review helpful. Just news print!By kimberleyApparently this is suppose to run through a printer, the paper jammed while trying to print. My husband suggested taping a piece of the paper to a regular piece of copy paper. That worked, but it is just one more step to getting a copy of the pattern. The product info states that the paper works well for paper piecing, it is difficult to see thru. I was searching for a short cut to tracing all the paper-

piecing patterns, but tracing on to traditional tracing paper is worth the time for good results. Would I buy this product again? No. 4 of 4 people found the following review helpful. carol doak's foundation paper was not what I expected it ...By Corie Anderson carol doak's foundation paper was not what I expected it to be. when I got it was wrinkled in the package. once I got it sorted though to the useable stuff. when I went to print with it the paper just tore. really wished it would have worked. I had a big project in mind.

Discover Easy Paper Piecing with Carol Doak's Foundation Paper! Use in most inkjet or laser printers or copy machines No shrinking, curling, or turning brittle! Holds up beautifully during stitching; tears away easily when you're done What makes Carol Doak's Foundation Paper different? It's lightweight (won't create bulk when you join sections) It's absorbent (less ink transfer where you don't want it) It's non-coated (fabric won't slip on it)

I now have a new favorite for foundation piecing with patterns I print on my inkjet printer-Carol Doak's Foundation Paper. The paper lies flat in the paper tray, and feeds perfectly. I don't get any bunched up printings. Every sheet feeds individually, resulting in perfect foundations for sewing. And it tears away without any effort-or stress on the stitches. It also allows me to sew sections together without a lot of bulk, which gives me more accurate blocks. (Quilters .com)If you love foundation piecing these papers are without question a MUST! They are fantastic. I had sewn several quilts which are foundation pieced. The first couple I printed my templates out on normal computer paper, oh what a mistake that was. When you tear out that paper it pulls the seams and it is really hard to get it all out. I then got some of Carol Foundation Papers to try, yes they will cost more to use but oh wow the difference, you will wonder why you bothered trying anything else. The paper will print through your normal printer and in most of Carol's books you will find a disk that includes Foundation Factory which has the templates on it so you can just print it straight from the computer onto these foundation paper's (and you can print them out at any size!). They tear out so easily, no pulling on the seam and you get it all out, no little pieces left! (Berrima Patchwork, 09/25/12)
