Carl L. Withner : (Cattleyas and Their Relatives: Vol. 3, Schomburgkia, Sophronitis, and Other South American Genera before purchasing it in order to gage whether or not it would be worth my time, and all praised (Cattleyas and Their Relatives: Vol. 3, Schomburgkia, Sophronitis, and Other South American Genera:

0 of 0 people found the following review helpful. Five StarsBy Daniel IriarteIt's not exactly new, but the descriptions are interesting and the style makes it a pleasant reading.0 of 0 people found the following review helpful. Very nice

bookBy Amelia16Brand new

Cattleyas are frequently called "the Queen of the Orchids," and Carl Withner's passion for them started before World War II. About 12 years ago he published the first in this series of six books, which now comes to a conclusion with this final volume. The South American Encyclia species have not previously been the subject of a book, and the genus presents many problems and difficulties. A few of the species are known from a single herbarium specimen and may well now be extinct because of the continuing loss of habitat. This volume also includes taxonomic and nomenclatural changes affecting species covered in the earlier volumes, as well as additions and changes to the text of each of the five volumes.

"This book in six parts will appeal to botanists and orchid growers, both professional and hobbyist. Dr. Withner brings clarity, precision and enthusiasm for this group of plants to our attention, and his unparalleled experience provides a wealth of information about species old and new, 'lost', 'rediscovered', and rare."--Joyce Stewart, Plantsman, December 1994--Joyce Stewart "Plantsman "About the AuthorIn 1990 Withner was granted the American Orchid Society's highest award, the Gold Medal, to honor his distinguished achievement in science and education. In 1996 the Orchid Digest Corporation awarded him its highest accolade, the Silver Medal for meritorious service to the orchid world. Dr. Withner lives in Bellingham, Washington, where he remains much occupied with orchid research, writing, and work with orchid societies.
