are obvious or repetitive to make buying this book worth it. As far as the instructions, they are clear and easy to follow with plenty of pictures to show you each step. I really, really like the projects called "Scribble" on page 56 and "Target" on page 64.3 of 3 people found the following review helpful. Fabulous!By MariaGreat book, packed with tons of information. I'm a newbie to this art, so I found this book perfect (although if you have a lot of experience, I think you will also find some great ideas here).All around great. I'll be keeping this one for a long time.11 of 11 people found the following review helpful. New inspiration welcomed!By Judith E. MooreJust when I thought I had exhausted all the different ways to create new chain designs, I bought Chains, Chains, and Chains and an entirely new world opened up for me! New techniques, new inspiration, new materials, and unique and exciting designs! I highly recommend this great book!!!!

This is the best book available on making fabulous jewelry chains. Chains can unchain a jeweler's creativity! These 25 non-traditional designs showcase an array of metals in dazzling combinations of sterling silver, gold, copper, aluminum, brass and bronze--along with a range of finishes and textures. From shimmering delicate silver teardrops to mixed-metal boxes that hold caged pearls, these dramatic necklaces, bracelets, and earrings are absolute showstoppers--joys to make and wear.

"I know some of you out there have been playing around with soldering, and this is right up your alley. Joanna Gollberg and Nathalie Mornu, talented duo, have put together 25 necklaces, bracelets, and earrings designs using handmade chain in Chains Chains Chains. I have to admit, it's very inspiring! What better way to spice up your handmade jewelry designs than to include chain that you made from scratch! I love the contemporary designs in the book. And really so many of the chains are lovely as jewelry by themselves with no other components. The technique section in the back shows great step-by-step photos." --Lorelei Eurto
